Profile

Full stack developer with 15 months of experience across five roles — three internships, a full-time Web Developer position, and a concurrent Full Stack Trainer role — spanning Java Spring Boot, C# .NET Core, React, and Next.js. Comfortable owning a feature end-to-end: schema design, backend logic, and frontend delivery, plus direct client communication and support. B.Tech in Information Technology (2026).

Experience

Web Developer, *Hype Strategies* 04/2026 – Present
Promoted to full-time after internship

- Deliver complete client web projects end-to-end, from requirements through deployment, building high-performance, SEO-optimized sites.
- Serve as primary technical point of contact for clients, providing post-launch support and troubleshooting.

Full Stack Trainer, *21st Academy* 12/2025 – Present
Sister organization of Hype Strategies

- Train students and career-switch professionals in full-stack development, breaking down core concepts (Java, Spring Boot, React) into structured, beginner-friendly modules.
- Conduct both online and offline workshops, adapting delivery format to diverse learner backgrounds and experience levels.

Web Developer Intern, *Hype Strategies* 12/2025 – 03/2026

- Shipped client websites as an intern under senior review — from requirements gathering through deployment — leading to a full-time offer after 4 months.
- Supported client sites post-launch, resolving issues and handling change requests under senior guidance.

Backend Developer Intern, *Flipflex* 10/2025 – 01/2026

- Developed a billing and inventory system in Java (Spring Boot), restructuring the schema to reduce data redundancy across core tables.
- Automated barcode generation and built an attendance-tracking module using hash-indexed lookups (O(1) retrieval) for employee records.
- Designed database schemas for a Hospital Management System, ensuring referential integrity and efficient data flow between patient and billing modules.

Full Stack Developer Intern, *Conprg Technology* 06/2025 – 07/2025

- Completed a hands-on learning internship in C# and .NET Core, building full-stack demo applications end-to-end.
- Built Todo and E-commerce demo projects, implementing CRUD operations and RESTful API endpoints in C# .NET Core.

Education

B.Tech, Information Technology, *Alpha College of Engineering* 11/2022 – 05/2026

Skills

Languages
Java (Advanced OOPs), C# (Advanced OOPs), JavaScript, TypeScript, Python

Frontend
React.js, Next.js, HTML5, CSS3, Bootstrap

Backend
Spring Boot, .NET Core, RESTful API Design, Microservices Architecture

Databases
PostgreSQL, MySQL, SQLite, MongoDB, Firebase Firestore — schema design & referential integrity

Tools & Deployment
Git, Postman, Swagger, Firebase, Google Cloud Run,
IntelliJ, VS Code, Visual Studio

Projects

Retail Billing & Inventory Management System, 10/2025 – 11/2025
Spring Boot (microservices), Firebase, Google Cloud, React.js — Flipflex
Live (headless integration): tgopitextile.com | Case study: joshva-developer.vercel.app/retail-billing-inventory

- Built a full billing and inventory system with automated barcode generation and real-time stock tracking.
- Implemented an analytics dashboard for sales, purchase, and profit reporting; added a staff attendance module.
- Architected and deployed the backend on Google Cloud Run for high availability; integrated it headlessly into T.Gopi Textiles' live storefront.

Hype OS — Business Operations Platform,
Next.js, Express, PostgreSQL (Prisma), TypeScript — Hype Strategies
Confidential client project — description abstracted per NDA

- Built a full-stack platform managing the end-to-end lifecycle of service clients — from intake and inspection through execution and completion — with role-based access for admins and field staff.
- Designed a status-driven workflow engine that moves each client engagement through defined stages, with every transition validated server-side and fully audit-logged.
- Built an offline-capable PWA for field staff, including photo capture, attendance tracking, automated scheduling, and push notifications, with actions queued locally and synced once back online.

Portfolio with Lead Engine & Headless CMS,
21st Academy — Hype Strategies
Live: 21stacademy.in | Case study: joshva-developer.vercel.app/lead-engine-portfolio

- Built a high-performance site with a custom lead-generation engine for prospective student inquiries, covering courses, workshops, and placements.
- Integrated a headless CMS to surface real-time training outcomes (5,000+ students trained, 500+ hiring partners, 95% placement rate) without requiring code changes.

Additional Client Work,
Next.js, React — Hype Strategies, Flipflex & Individual
Life Comrades — home healthcare booking platform with login and order tracking (life-comrades.vercel.app, Hype Strategies); Viva Kids World — preschool website (vivakidsworld.com, Flipflex); freelance sites for travel, HVAC, and IT-consulting clients — Jolly O Jolly Holidays, Cool Max India, Cynchronix.

Leadership

Young Indians (YUVA) – Alpha College of Engineering, *Secretary* 02/2024 – 12/2025

- Oversaw club operations and coordinated with stakeholders across multiple institutional events.
- Mentored peers and organized team logistics, driving consistent participation in community activities.

Certifications

- Java with Spring Boot — Naan Mudhalvan
- Business English Certificate, Preliminary (B1) — Cambridge English
- Cybersecurity — Cisco Networking Academy
- Cisco Packet Tracer — Cisco Networking Academy

Languages

- Tamil
- English
